

The TC-4 Dual composite sampler is designed for use in highly corrosive environments where it is cost effective to eliminate possible refrigerator repair costs and use a disposable refrigerator. This is why the TC-4 Dual uses a stainless steel stand and disposable refrigerator in place of traditional refrigeration. The sampling body is the same unit from the TC-3 model, so the TC-4 Dual retains all of the durability and accuracy of our flagship sampling line.

Key Features & Benefits

- Funnels are easily removed for easy cleaning
- Wetted surfaces made of stainless steel for durability
- Three sampling lines allows for 3 in 1 cost reduction
- Flow-through reservoir ensures representative sample
- Sampling device is an open cup that ensures capture of suspended solids
- Elimination of costly refrigerator repair.
- Reduction in weight by 61% when compared to the TC-3 models.
- Ability to choose either OEM or aftermarket refrigerators
